

Instruction

Look at Each Page Carefully

- Every page shows a fun scene with the Lorax, Truffula trees, forest animals, and green energy like solar power, wind turbines, and electric cars!

Color The page

- Use your favorite colors — make the sunshine bright, the trees fluffy, and the energy clean!
- Try using yellow for solar power, blue for wind and water, and green for Earth-friendly choices.

Think Like the Lorax

Ask yourself or someone near you:

- What kind of energy is in this picture?
 - Is it good for the Earth?
 - What can I do to help the planet like the Lorax?

Talk & Share

- After you color a page, share it with your family or teacher!
- Teach them something you learned about green energy.
